

AUTO COOL 150-HD CONTROLLER FOR SEMI TRUCKS - DIESEL ENGINES

- * Remove old fan clutch & install a large 12 volt DC electric fan or fans.
- * Automatic radiator temperature control with the fan's RPM.
- * Very efficient Pulse Width Modulation controls the fan's RPM.
- * Very high reliability with energy saving using modern solid state electronics.
- * Maintain stable engine temperature in all road conditions with Auto Cool 150-HD.
- * No relays switching fans to arc, burn and fail over time and miles.
- * Avoid temperature and pressure peaks and working radiator metal.
- * Preset the radiator operating temperature with the black knob on the controller.
- * Fail safe turns on with switch - puts fan into high RPM.
- * A/C small control presets fan to minimum RPM.
- * Cool down timer after the ignition is turned off holds fan on.
- * Auto Cool controllers sold with a ONE year warranty.

**SOLID STATE TRANSISTOR
VERY RELIABLE &
NO ARCING LIKE RELAYS**
